AMAN KUMAR SHAW

Senior Oracle Database Administrator • Oracle Cloud DBA • Site Reliability Engineer • Automation Specialist

Kolkata, West Bengal, India
+91-9088267526
✉ amanshaw03@gmail.com

Professional Highlights

- **8+ Years Oracle DBA & SRE Experience**
- **Managed 1,000+ Oracle Databases**
- **Supported 30 TB+ Databases**
- **Managed 5-Node Oracle RAC Clusters**
- **Delivered 200+ Upgrade & Migration Projects**
- **OCI, AWS & Linux Expert**
- **24x7 Global Production Support**

Technical Skills

Oracle RAC | Data Guard | RMAN | ASM | OEM | Exadata | ExaCC | AWR | ASH | OCI | AWS | Azure | Ansible | AWX | GitLab CI/CD | Jenkins | Python | Shell Script | Linux | Oracle Linux | RHEL | CentOS | PostgreSQL | MySQL | Prometheus | Grafana | Prometheus Alertmanager | Kubernetes | Docker | Containers | ServiceNow

Certifications

Oracle Cloud Infrastructure 2025 Certified Architect Associate

AWS Certified Solutions Architect Associate

Oracle Database 19c Administration Workshop

Education

Bachelor of Technology (B.Tech)
Electronics & Communication Engineering
MCKV Institute of Engineering, MAKAUT
CGPA: 7.89

Higher Secondary Education (Science)
M.G. Rungta Academy
WBCHSE

Secondary Education
Khalsa High School
WBBSE

Professional Summary

Senior Oracle Database Administrator and Site Reliability Engineer with 8+ years of experience managing large-scale Oracle database environments across on-premises infrastructure, Oracle Cloud Infrastructure (OCI), AWS, and Linux platforms.

Expertise in Oracle RAC, Data Guard, RMAN, ASM, Exadata, ExaCC, performance tuning, database upgrades, migrations, backup & recovery, automation, cloud operations, CI/CD implementation, and enterprise-scale production support.

Managed 1,000+ Oracle databases including mission-critical 30 TB environments and 5-node Oracle RAC clusters. Successfully delivered 200+ database upgrades and migration projects while implementing automation solutions using Ansible, GitLab CI/CD, Shell Scripting, Python, and enterprise DevOps practices.

Professional Experience

Tata Consultancy Services (TCS)

Site Reliability Engineer

Feb 2025 – Present | European Telecommunication Client

- Designed and implemented CI/CD pipelines supporting AI-powered Oracle database performance analysis solutions.
- Automated Oracle database provisioning through Ansible-driven deployment frameworks, significantly reducing manual effort and deployment timelines.
- Developed enterprise automation solutions for bulk Oracle database startup and shutdown activities across multiple environments.
- Implemented automated execution frameworks for Oracle database administration tasks and script deployments.
- Automated Oracle database export and import operations using Ansible-based workflows.
- Developed automated password expiry prevention solutions for application accounts across Oracle environments.
- Integrated GitLab CI/CD pipelines with Oracle database administration workflows.
- Worked on Kubernetes for deploying, managing, and supporting containerized infrastructure and database workloads.
- Installed and configured Oracle and MS SQL Server in Kubernetes environments, ensuring stable deployment and operations.
- Deployed and managed PostgreSQL using Kubernetes Operators, improving automation, scalability, and operational efficiency.
- Implemented monitoring and observability for database servers outside Kubernetes using Prometheus and Grafana.
- Created and maintained Grafana dashboards and Prometheus-based monitoring to track database health, performance, and availability.
- Participated in incident response, root cause analysis, and post-incident review activities.

Tata Consultancy Services (TCS)

Senior Oracle Database Administrator

Mar 2022 – Present | European Telecommunication Client

- Administered and supported 1,000+ Oracle databases across OCI, AWS, Linux, and on-premises environments.
- Managed Oracle RAC, ASM, Data Guard, RMAN, OEM, Exadata, and ExaCC infrastructure.
- Supported mission-critical databases up to 30 TB and 5-node Oracle RAC clusters.
- Successfully delivered 200+ Oracle database upgrade and migration projects including Oracle 19c upgrades.
- Performed advanced Oracle performance tuning using AWR, ASH, SQL tuning, and wait-event analysis.
- Designed and implemented Oracle Data Guard physical standby solutions for high availability and disaster recovery.
- Led Oracle database migrations across Linux platforms and infrastructure modernization initiatives.
- Automated RMAN reporting, monitoring, and routine DBA activities using Shell scripting.
- Performed backup, recovery, cloning, refresh, and disaster recovery testing activities.
- Executed quarterly Oracle Grid Infrastructure and Database patching activities.
- Developed proactive monitoring and database health-check automation frameworks.
- Collaborated with Oracle Support through Service Request (SR) management and issue resolution.
- Provided 24x7 production support ensuring database availability and SLA compliance.
- Resolved critical performance bottlenecks through workload analysis and system tuning.

Accenture

Oracle Database Administrator

Jan 2020 – Mar 2022 | Global Automotive Manufacturing Client

- Administered Oracle, PostgreSQL, and MySQL production database environments.
- Executed database creation, decommissioning, migrations, upgrades, refreshes, and cloning activities.
- Performed point-in-time recovery and cross-platform restoration activities.
- Automated Oracle and PostgreSQL patch deployment using Ansible.
- Conducted Oracle database performance tuning using AWR reports and workload analysis.
- Automated recurring schema refresh activities using Shell scripting.
- Reduced recurring incidents through proactive monitoring and preventive maintenance.
- Supported 24x7 production operations while maintaining SLA commitments.
- Managed Oracle Enterprise Manager 11g and 12c monitoring environments.
- Performed capacity planning, growth analysis, backup validation, and database health checks.

Cognizant Technology Solutions

Oracle Database Administrator

Nov 2018 – Jan 2020 | Global Retail Client

- Supported large-scale Oracle production database environments.
- Performed monitoring, health checks, backup validation, and growth analysis activities.
- Automated recurring DBA operational activities using Shell scripting.
- Managed Oracle Enterprise Manager monitoring and alerting infrastructure.
- Investigated and resolved production incidents within SLA timelines.
- Supported database maintenance, patching, backup, and recovery operations.
- Worked closely with application teams to troubleshoot database-related issues.
- Performed user management, tablespace administration, and routine database maintenance.
